Education

Army Institute of Technology, Pune **Aug 2023 – Expected May 2027**
Bachelor of Engineering, Electronics and Telecommunications Engineering *CGPA: 7.68*

Experience

Fydo **Aug 2025 – Jan 2026**
Software Engineer Intern *Bhubaneswar*

- Built an enterprise-grade Admin Dashboard with React.js handling 50K+ multi-tenant datasets with real-time visualization and sub-second query performance.
- Built high-conversion Event Booking System using Next.js SSR/SSG, achieving 95+ Lighthouse scores and 28% increase in booking completion rates.
- Engineered text editor using Meta's Lexical framework, implementing rich formatting and collaborative editing features.

Sowwork **Feb 2025 – June 2025**
Software Engineer Intern *Bangalore*

- Built a marketplace for Artists with NestJS and React Native, featuring AI-powered semantic search and real-time booking system handling.
- Implemented hybrid notification system using Firebase Cloud Messaging and WebSockets, achieving 99.7% delivery reliability with sub-200ms latency.
- Developed AI-powered semantic search using vector embeddings and transformer models, improving artist discovery accuracy by 45%.

WarrantyIT **Oct 2024 – Jan 2025**
Full-Stack Mobile Developer Intern *Ireland*

- Built a high-performance warranty tracking app using React Native, Express.js, and PostgreSQL.
- Built an invoice automation microservice using Python, FastAPI, and Moondream LLM from HuggingFace, achieving 92% extraction accuracy.
- Deployed scalable infrastructure on AWS (EC2, S3) and streamlined delivery with GitHub Actions CI/CD.
- Achieved 85% test coverage using Jest, slashing post-deployment bugs and boosting team velocity.

Metleap **Aug 2023 – Jul 2024**
Full-Stack Web Developer Intern *Bangalore*

- Built a gamified web platform for teachers under the Guru Puraskar initiative, enabling educators to submit and peer-rate responses; developed using PHP, JavaScript, and MySQL for 400K+ users.
- Created a Chrome extension using React that displays Bible verses, with a backend in Express.js and MongoDB hosted on DigitalOcean, enabling real-time content sharing via Facebook's API.
- Built a full-stack CMS for a college institution to manage admissions and administrative workflows, using React, Express.js, and MongoDB; deployed on DigitalOcean for high availability.

Projects

Smart AI Resume Analyzer | *FastAPI, Remix, Transformers, LangChain, PostgreSQL* **Jul 2025**

- Built a full-stack resume analyzer using FastAPI and Remix to parse resumes and compute match scores.
- Developed FastAPI endpoints for parsing, scoring, and enhancing resumes; stored structured data in PostgreSQL.
- Implemented NLP pipeline and interactive Remix frontend.

GoRedis | *GoLang, net, resp* **Jan 2026**

- Built a RESP (Redis Serialization Protocol) from scratch, enabling seamless communication with clients for data types like Strings, Lists, and Integers.
- Go (Golang), chosen for its efficient garbage collection and first-class support for concurrent networking primitives.
- Utilized a custom in-memory key-value abstraction to manage data storage independently from the networking layer.

Technical Skills

Languages: C/C++, Go, Rust, JavaScript, Kotlin, PHP, Python, TypeScript
Frameworks: React, Next.js, Remix, NestJS, FastAPI, Fiber, React Native, Expo
Databases: MongoDB, MySQL, PostgreSQL, ScyllaDB
DevOps: Docker, Kubernetes, Terraform, Ansible, Jenkins, GitHub Actions
AI/ML: PyTorch, TensorFlow, Hugging Face, Transformers, Langchain, Langgraph
